

Teach the world!

You want to tell the world all about the advances being made at our universities or perhaps cover the news in your local community about the contributions of those who are in the local food, fiber, land and natural resource industry.

More of our alumni are finding opportunities in the fields of communications, outreach and teaching across the state and region. Opportunities in radio, television, print media and the Web are available to those who have a foundation in agriculture, natural resources and communications. The Agricultural Science major is designed to allow you to complete a minor in the College of Communications and Information in preparation for careers in the dynamic field of agricultural communications, including agrijournalism, public relations and broadcasting.

You enjoy people and you want to help others learn all about the world around us. Consider the Agricultural Education concentration in the Agricultural Science major. Alumni are teachers in Tennessee public schools' agriscience-FFA classes. Teacher certification in Agricultural Education is obtained in collaboration with UT's College of Education, Health and Human Sciences. You can become a part of this exciting career by becoming a member of UT's Collegiate FFA Chapter.

Or, you want to reach others and help them become better at what they do. You might be looking for a career in a state's Extension Service. That's just what Agricultural Extension Education alumni do – provide support and education to the producers of our food and managers of our natural resources. If this is what you are

looking for, then follow the Agricultural Science – Agricultural Extension Education concentration.

Alumni from the Agricultural and Extension Education Program have found rewarding careers in other fields as well, including:

- Banking and finance
- Sales and marketing
- Peace Corps volunteer
- Journalism

Do you want to help the world?

W

ell, if you do, you should consider the College of Agricultural Sciences and Natural Resources.

Why? Because our alumni play an important role in improving the quality of our lives and the health of the planet.

What makes the UT College of Agricultural Sciences and Natural Resources (CASNR) unique?

- The highest-quality university food systems and natural resources program in Tennessee
- Faculty engaged in innovative biotechnology, food and natural resources economics, environment and bio-resources research
- Faculty-led international study programs that take students to Thailand, Australia, Jamaica, Ireland, England, Italy and elsewhere
- Award-winning co-curricular clubs and teams
- Sponsorship of honor societies, professional fraternities and a sorority, and student chapters of professional organizations
- An honors program where students work one-on-one with faculty mentors

What can CASNR offer me?

CASNR cares about the quality of education its students receive, through:

- Challenging courses
- Opportunities for personal and career development
- Personalized advising
- Small class size with a student-centered learning environment
- Internship and coop opportunities with regional, national and international firms
- Annual CASNR career fair and on-campus interviews

- Caring faculty and staff
- Extracurricular activities supported by faculty
- Excellent preparation for advanced study in graduate and professional schools, including medicine, law, veterinary medicine, dentistry, physical therapy, nursing and pharmacy
