

Ensure the availability of a safe, abundant, secure and nutritious food supply for the world's consumers

If this is what you want to do, then you want to be a food scientist. Food processing is one of the largest manufacturing industries in the United States.

The tools of a food scientist include a working knowledge of chemistry, microbiology and engineering. Food scientists then apply this knowledge to the production, processing, preservation, evaluation and distribution of food products.

As the world's population continues to increase and the awareness of the importance of a safe and affordable food supply grows, so does the demand for Food Science and Technology graduates.

- Food – the largest manufacturing industry in the United States – includes processors of frozen, canned and fresh foods; bakery and candy items; and dairy and meat products
- In education, governmental agencies and private firms that support food processing, including government food safety-and-quality inspection and packaging agencies, and equipment and ingredient suppliers
- In new product development and research, quality assurance supervision, production management, marketing, microbiology, food/flavor chemistry and sensory evaluation

Food Science and Technology graduates find acceptance into graduate or professional schools that have included pharmacy programs, including UT and Samford University, and medical schools, including UT, Emory, Duke and Vanderbilt.

Do you want to help the world?

W

ell, if you do, you should consider the College of Agricultural Sciences and Natural Resources.

Why? Because our alumni play an important role in improving the quality of our lives and the health of the planet.

What makes the UT College of Agricultural Sciences and Natural Resources (CASNR) unique?

- The highest-quality university food systems and natural resources program in Tennessee
- Faculty engaged in innovative biotechnology, food and natural resources economics, environment and bio-resources research
- Faculty-led international study programs that take students to Thailand, Australia, Jamaica, Ireland, England, Italy and elsewhere
- Award-winning co-curricular clubs and teams
- Sponsorship of honor societies, professional fraternities and a sorority, and student chapters of professional organizations
- An honors program where students work one-on-one with faculty mentors

What can CASNR offer me?

CASNR cares about the quality of education its students receive, through:

- Challenging courses
- Opportunities for personal and career development
- Personalized advising
- Small class size with a student-centered learning environment
- Internship and coop opportunities with regional, national and international firms
- Annual CASNR career fair and on-campus interviews

- Caring faculty and staff
- Extracurricular activities supported by faculty
- Excellent preparation for advanced study in graduate and professional schools, including medicine, law, veterinary medicine, dentistry, physical therapy, nursing and pharmacy
