

Create landscapes in urban, suburban and rural communities

We crave beautiful landscapes – the exquisite, balanced, varied designs of nature. When we carve out of natural landscapes places for us to live, work, drive and play, we sometimes miss the original beauty.

So it is with a great sense of rightness and harmony that we strive to recreate around our homes, businesses and public areas an attractive landscape, blending rocks, water and plants of all colors, sizes and kinds. And it's not just an issue of "pretty"; creative landscaping can enhance both emotional and physical health, not to mention improving the value of the real estate.

The landscaper balances the concerns of people and the environment in designing landscapes, installing plantings and stewarding these creations. Ours are "green" endeavors, melding art, science and business into creative acts of beautifying our surroundings.

Alumni of the Landscape Design and Construction concentration in the Plant Sciences major have careers in three main areas:

- Residential garden design: a growing market as more and more people seek professional guidance in developing their home landscapes
- Landscape enhancement and maintenance: building new residential or commercial landscapes, or enhancing and caring for existing landscapes
- Environmental restoration: landscape design and construction aimed at restoring disturbed natural areas such as streambanks, wetlands, shorelines, woodlands and meadows

Do you want to help the world?

W

ell, if you do, you should consider the College of Agricultural Sciences and Natural Resources.

Why? Because our alumni play an important role in improving the quality of our lives and the health of the planet.

What makes the UT College of Agricultural Sciences and Natural Resources (CASNR) unique?

- The highest-quality university food systems and natural resources program in Tennessee
- Faculty engaged in innovative biotechnology, food and natural resources economics, environment and bio-resources research
- Faculty-led international study programs that take students to Thailand, Australia, Jamaica, Ireland, England, Italy and elsewhere
- Award-winning co-curricular clubs and teams
- Sponsorship of honor societies, professional fraternities and a sorority, and student chapters of professional organizations
- An honors program where students work one-on-one with faculty mentors

What can CASNR offer me?

CASNR cares about the quality of education its students receive, through:

- Challenging courses
- Opportunities for personal and career development
- Personalized advising
- Small class size with a student-centered learning environment
- Internship and coop opportunities with regional, national and international firms
- Annual CASNR career fair and on-campus interviews

- Caring faculty and staff
- Extracurricular activities supported by faculty
- Excellent preparation for advanced study in graduate and professional schools, including medicine, law, veterinary medicine, dentistry, physical therapy, nursing and pharmacy
